Summary

An ambitious, self-taught web developer with experience in structuring and developing both front and back-end areas of websites and web applications.

I wish to pursue a career in web development as I have a passion for creating amazing user experiences and developing functionality into projects.

I am able to complete projects efficiently and on time and am constantly learning new languages and frameworks to improve my knowledge and what I can do.

My Skills

- Advanced knowledge of JavaScript.
- Advanced knowledge of several JavaScript frameworks such as React.
- Developing beautiful, functional sites and applications.
- Website optimization
- Problem solving skills
- Front-end development
- Back-end development
- Great communication skills
- Search Engine Optimization
- Website layout and design skills

Experience

I have developed multiple projects to showcase some of my skills,

Chat Web Application

Developed a chat app that allows users to specify their name and the room they'd like to join, they are then connected to the room and can send and receive messages in real time with anybody else in that room. Created with react, express and web sockets.

Getaway booking site

Created a site that allows users to browse getaways for their vacation, select their dates and complete a checkout process using stripe. Users can update their account information, and view their bookings. Created with the MERN tech stack.

Recipe search

Developed a web application that users can search for recipes with, uses API calls to retrieve data and display it to the user. The user is able to bookmark recipes which are saved through using local storage. Client side rendered with API.

Twitter alternative

A site that allows users to sign up and post "tweets" that other users can see. Users are able to like, comment and delete posts.

... and more!

Technical Skills

Javascript	Express
React.js	Socket.io
Redux	MongoDB
HTML	Mongoose
CSS	Next.js
SASS	GraphQL (Apollo)

Work Experience

During my past work experiences, I have been studying web development in my spare time and developing my own projects.

The Herb Farm

While studying at the henley college I had a part time job at the herb farm, where I was responsible for running the shop and helping out wherever I was needed.

Ability to provide excellent customer service

Responsibility of running the shop on my own

Responsibility of taking in and processing new orders and keeping track of stock.

The Bird in Hand

After the herb farm, I now have my current job at the bird in hand, which is a restaurant / pub where I work as a bartender and waiter.

Providing excellent customer service

Working in high pressure environment to meet deadlines.

Dealing with any issues or complaints in an appropriate way and making sure customers leave happy.
